
A true game-changer of smart home market!

FIBARO

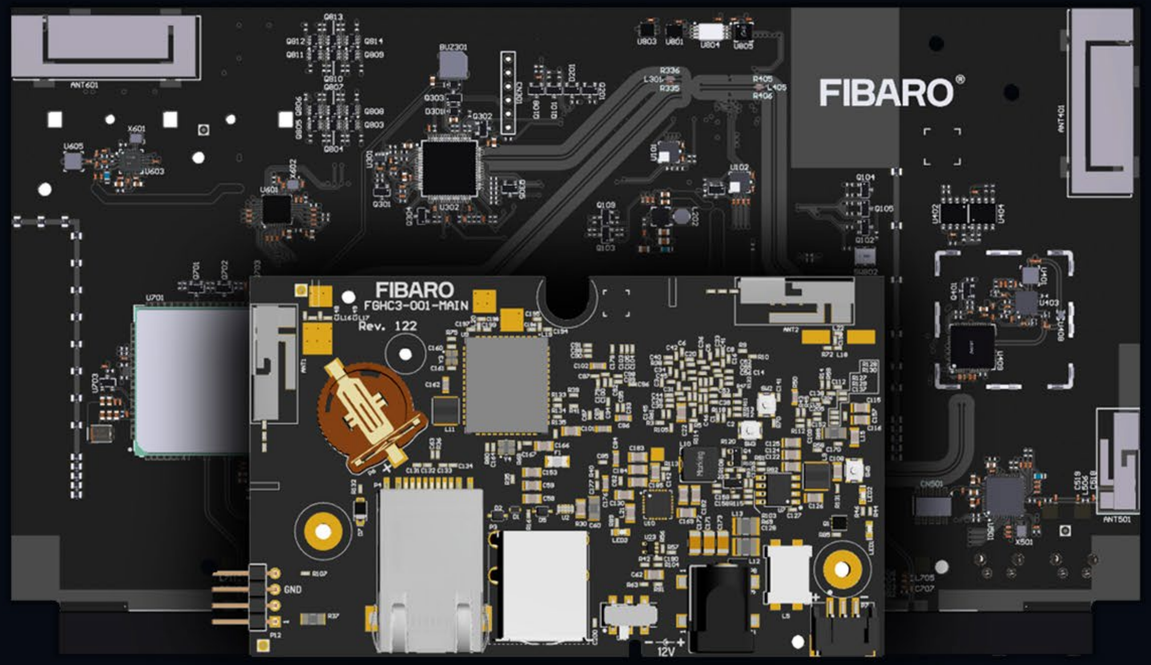
FIBARO

Explore the most advanced gateway

Home Center 3 is the world's most advanced smart home gateway enabling intuitive home management.
It is a result of our 10 years of experience and numerous comments from FIBARO users and installers.

It is a modern and reliable device that allows you to easily control all smart home features with a single button, gesture or word.

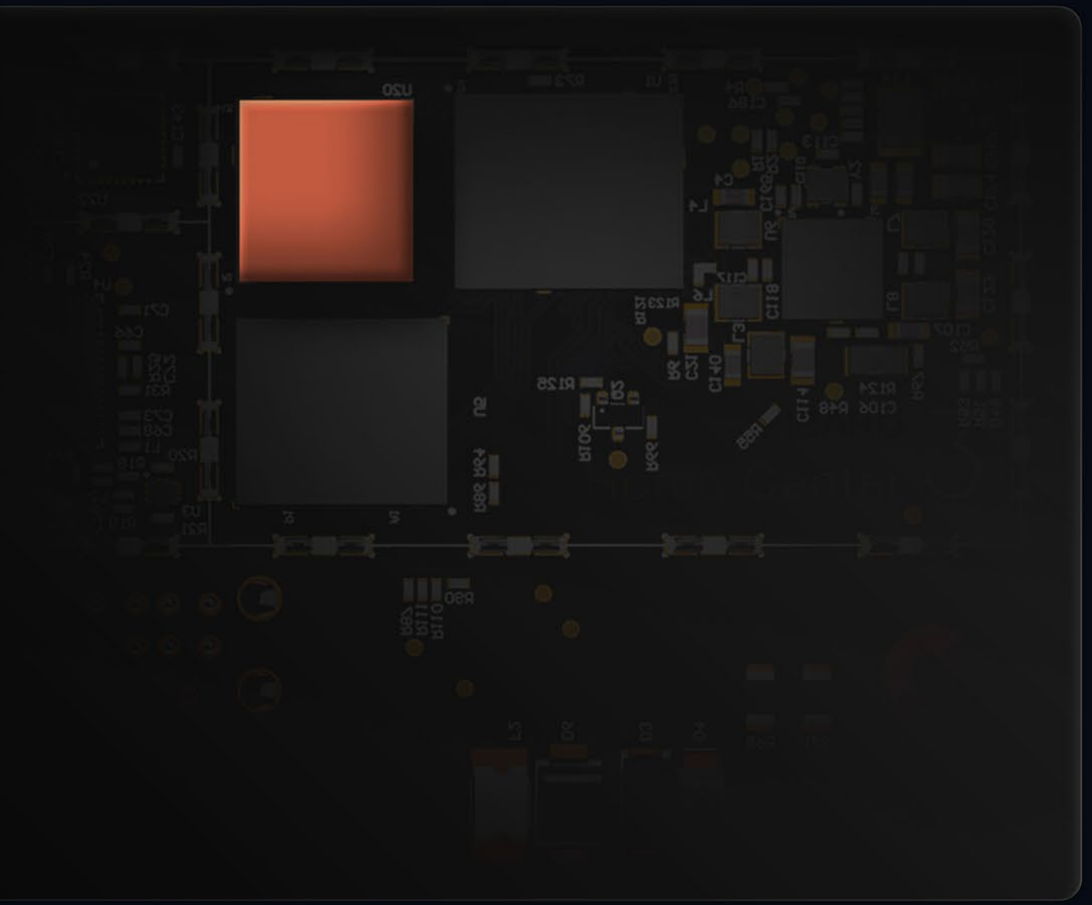
Gates & blinds | HVAC | Mood | Multimedia | Safety | Smart garden | Security | Lighting



A unique approach to quality

When designing Home Center 3, we had focused on users who require the highest quality from the very beginning. We decided to design a dedicated platform from scratch in ours R&D department. Compared to the solutions available on the market, this is top performance and reliability in one.

FIBARO



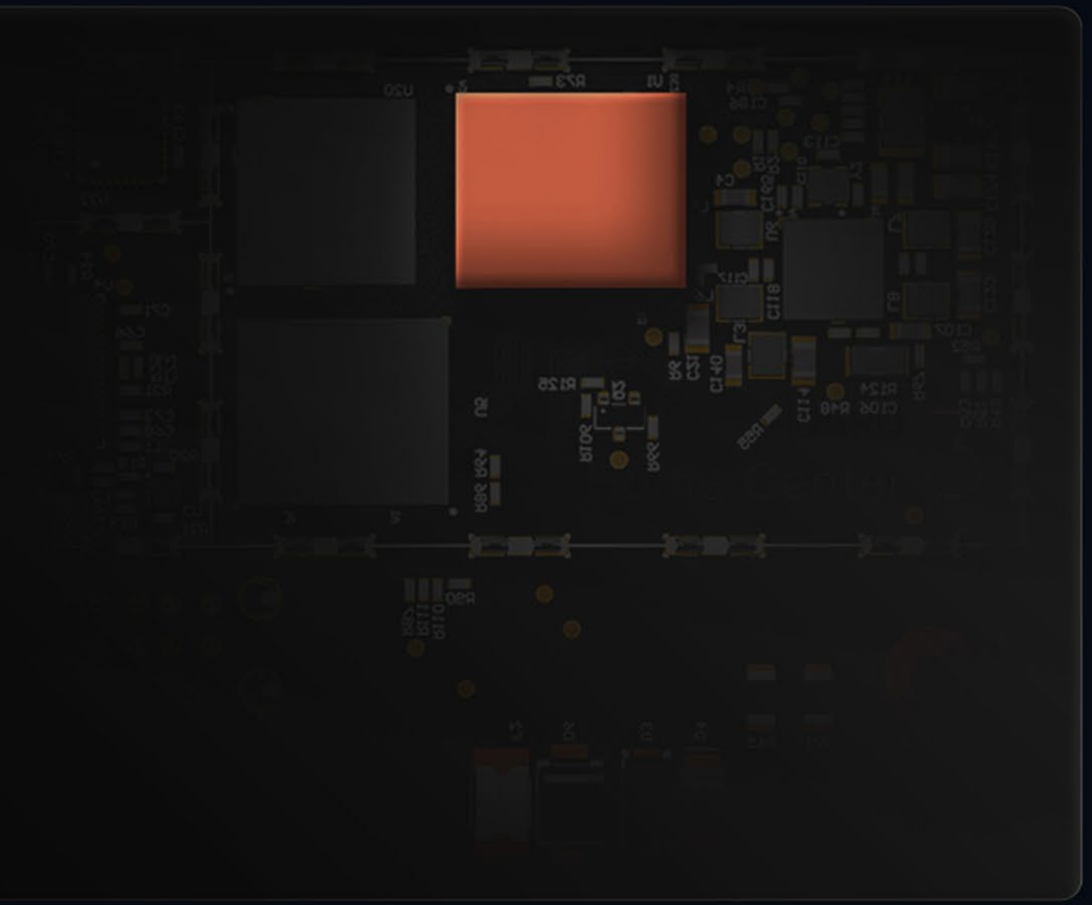
Stability and unique performance

1,3x faster processor
than Home Center 2

Home Center 3 — 4x1,2 GHz

Home Center 2 — 2x1,8 GHz

FIBARO



Stability and unique performance

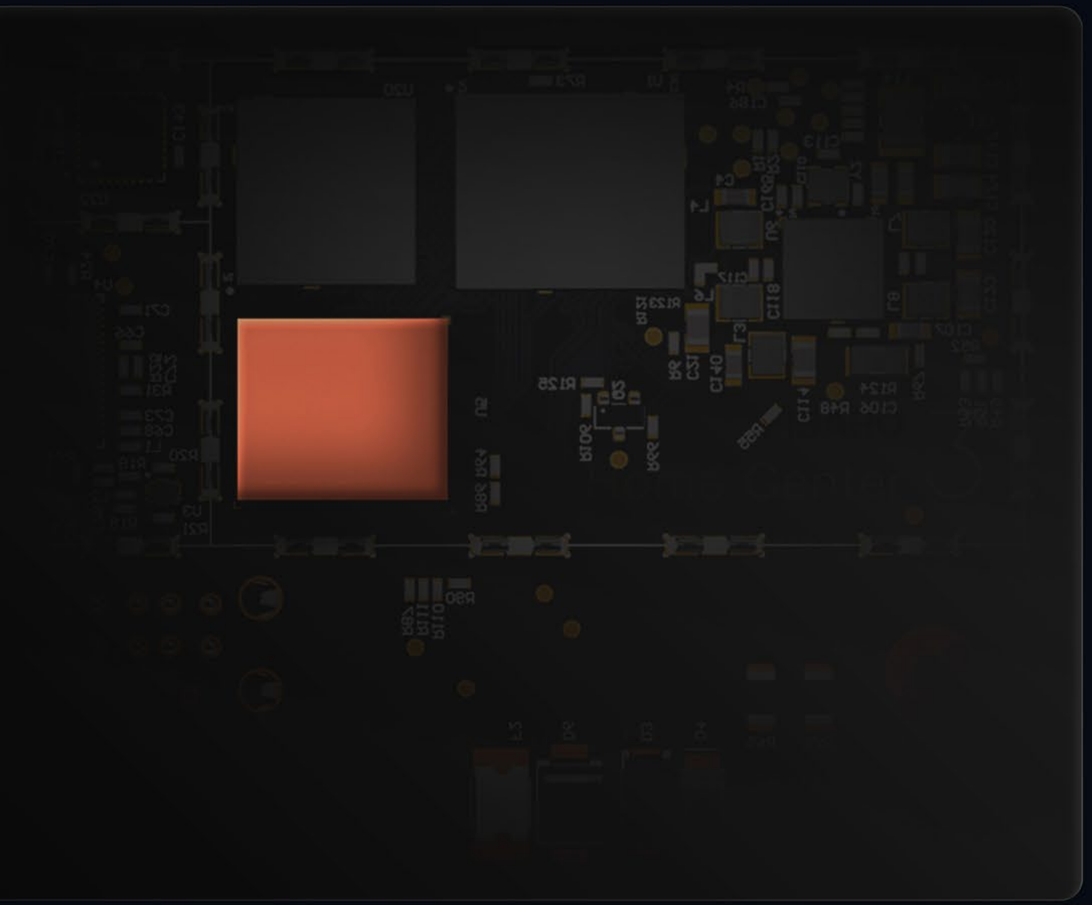
2x more RAM memory

than Home Center 2

Home Center 3 — 2GB

Home Center 2 — 1GB

FIBARO



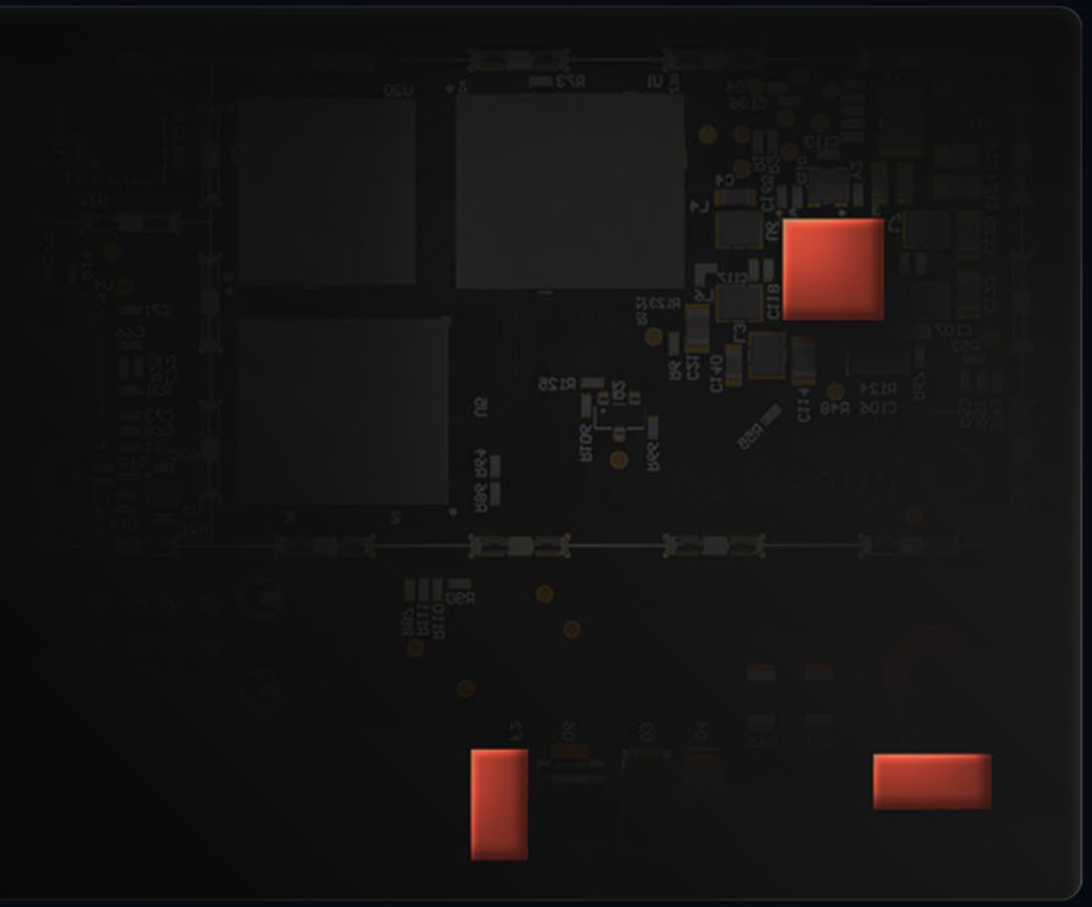
Stability and unique performance

4x larger flash memory
than Home Center 2

Home Center 3 — 8GB

Home Center 2 — 2GB

FIBARO



Stability and unique performance

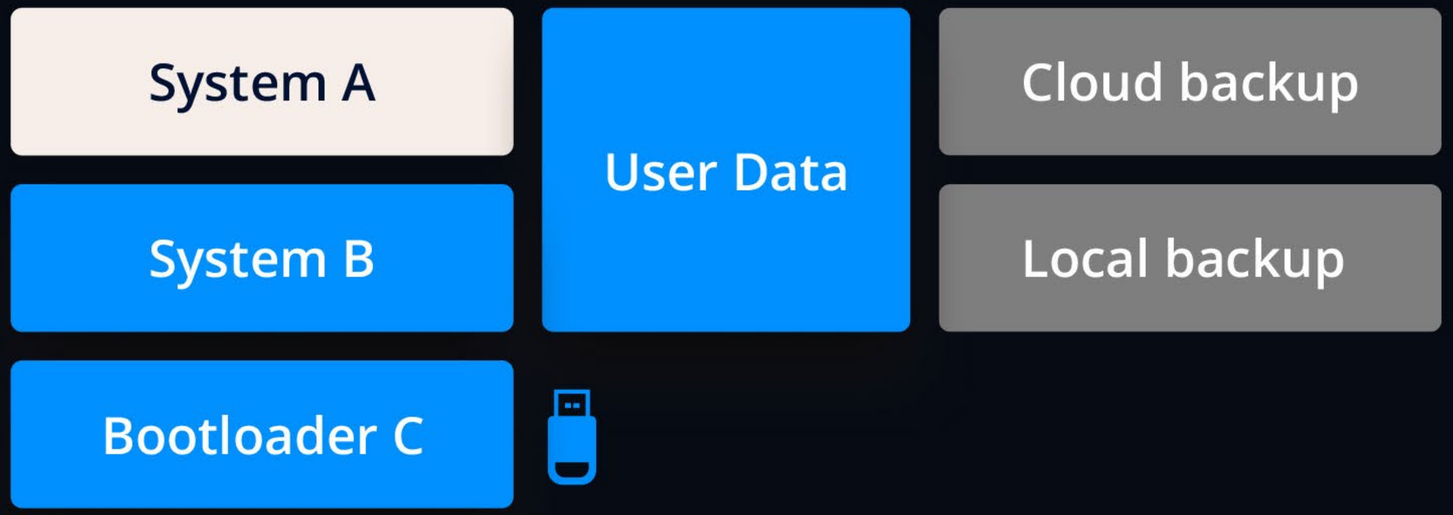
50% greater range
than Home Center 2

Home Center 3 — up to 150m

Home Center 2 — up to 100m

Triple data security system

Apart from A and B systems which after updating the OS allow to restore the previous version,
Home Center 3 has another C system. It acts as an emergency flash drive for the Installer, enabling settings recovery
in the event of system A and B failure. No more Home Center service.



FIBARO

Safety first

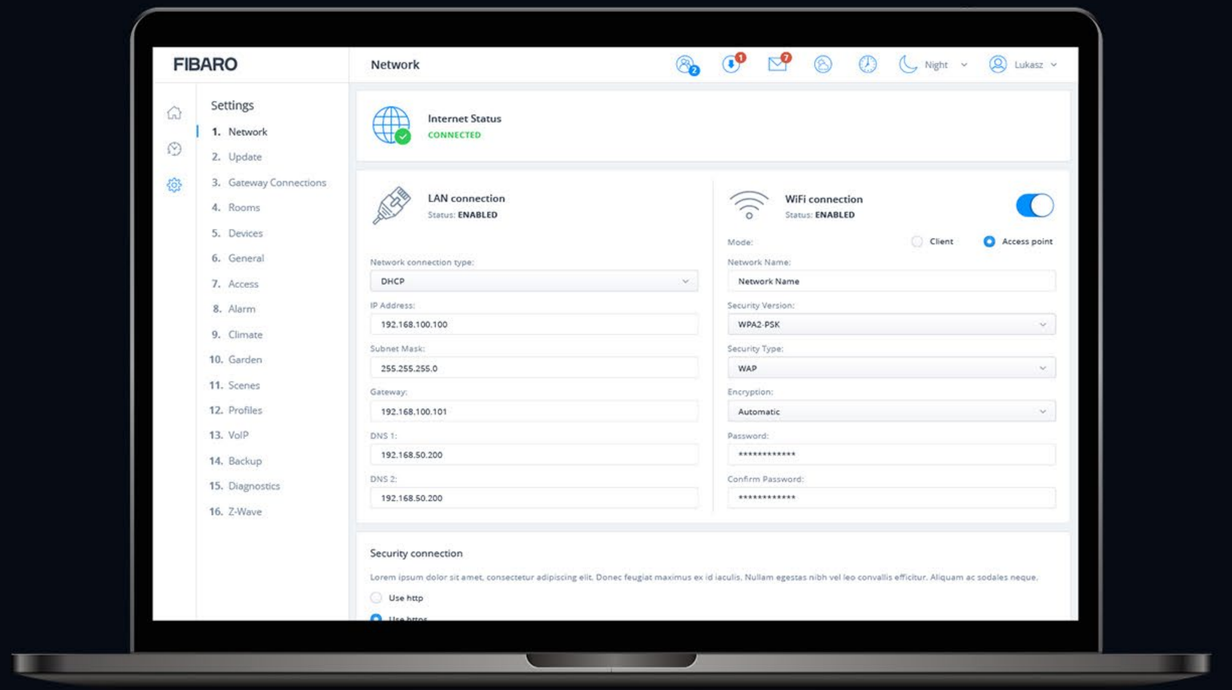
Data and access to FIBARO smart home are well protected. All up-to-date security matters make the Home Center 3 a data fortress that keeps the privacy safe.

- Encrypted user data
- Secure communication
- FIBARO ID authentication
- System files protection

FIBARO

Fast configuration process

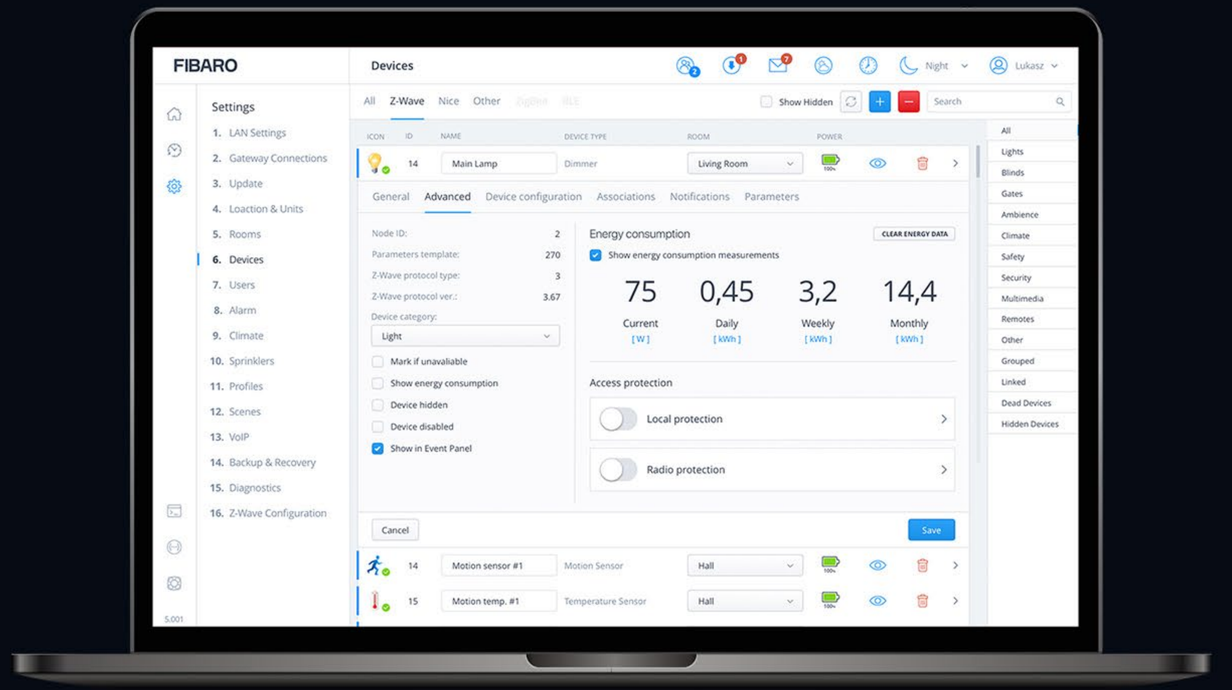
The new configuration process is much simpler and quicker. In a few short steps,
in just several dozen minutes, a smart home system tailored to the needs of residents is ready to use.



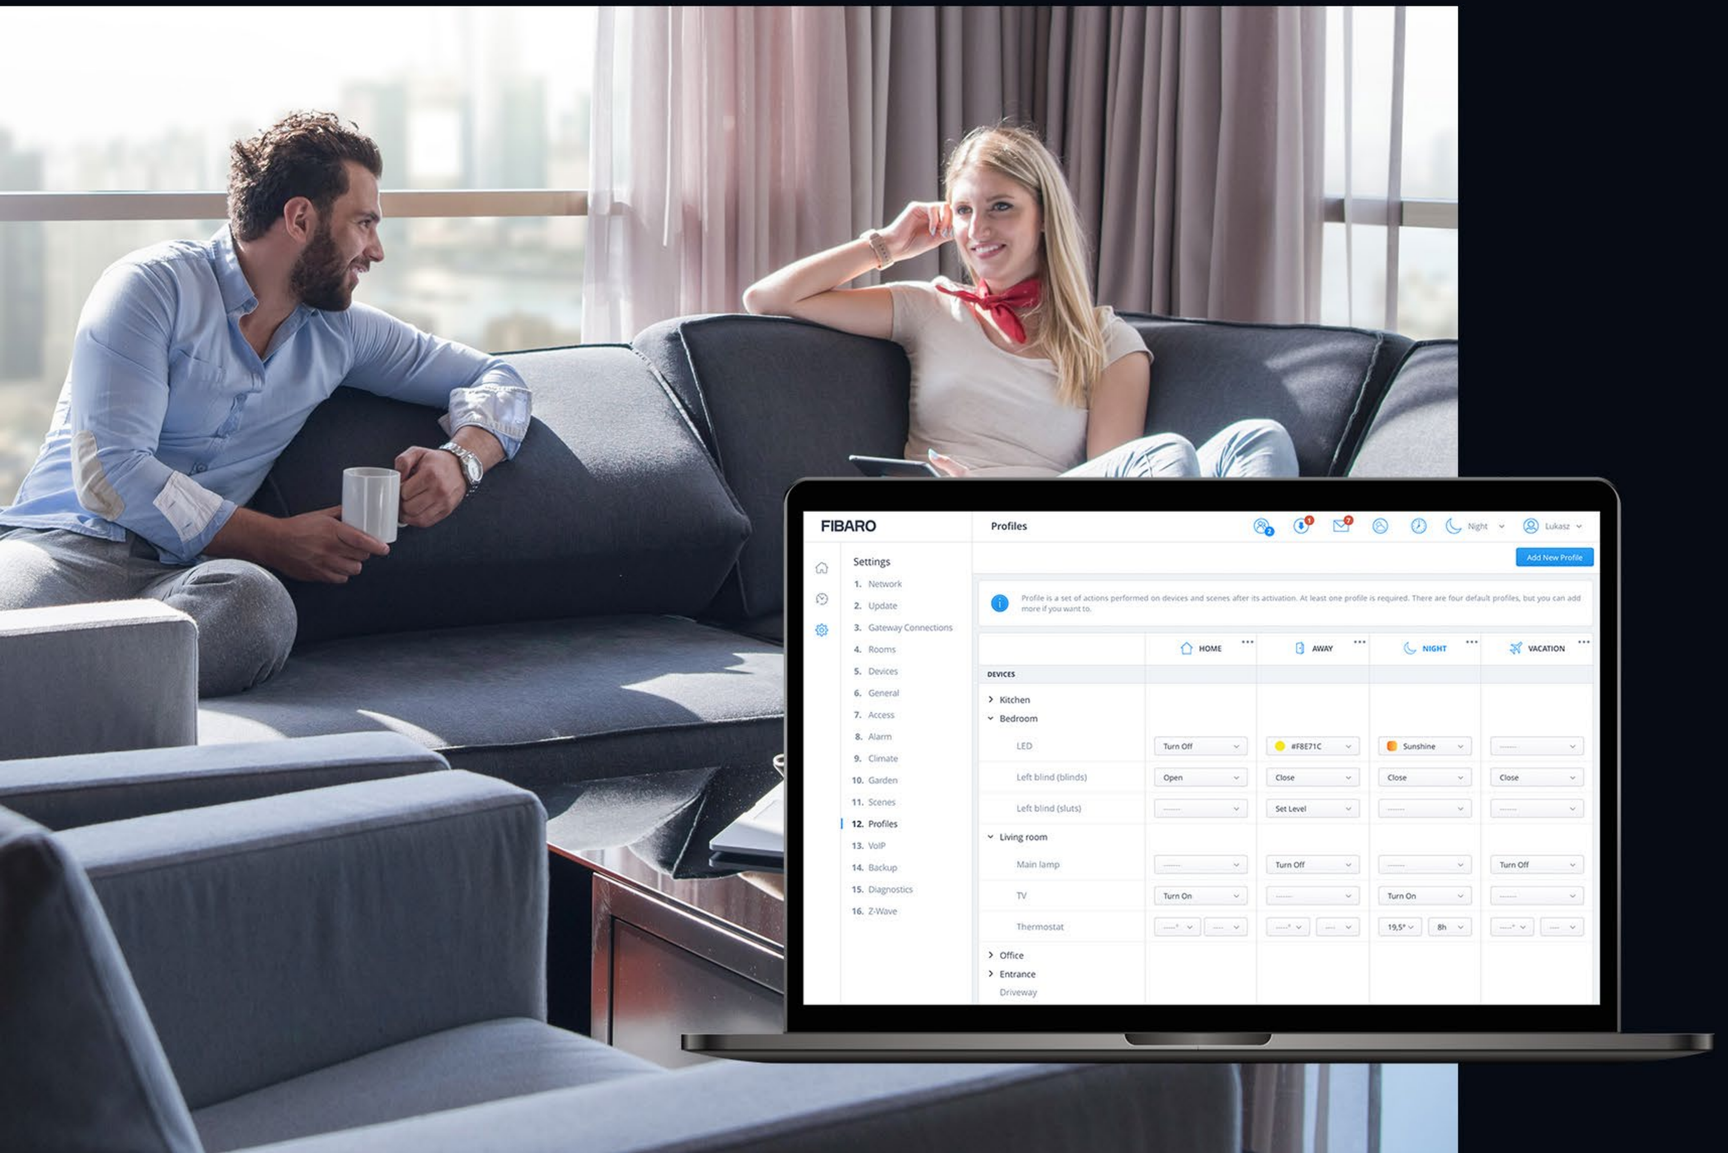
FIBARO

Devices panel - all in one place

All devices connected to the system are now available within one screen.
To shorten the time necessary to create the FIBARO System, the installer assign them to rooms, change icons and parameters on one screen. No more jumping between several tabs or pages.



FIBARO



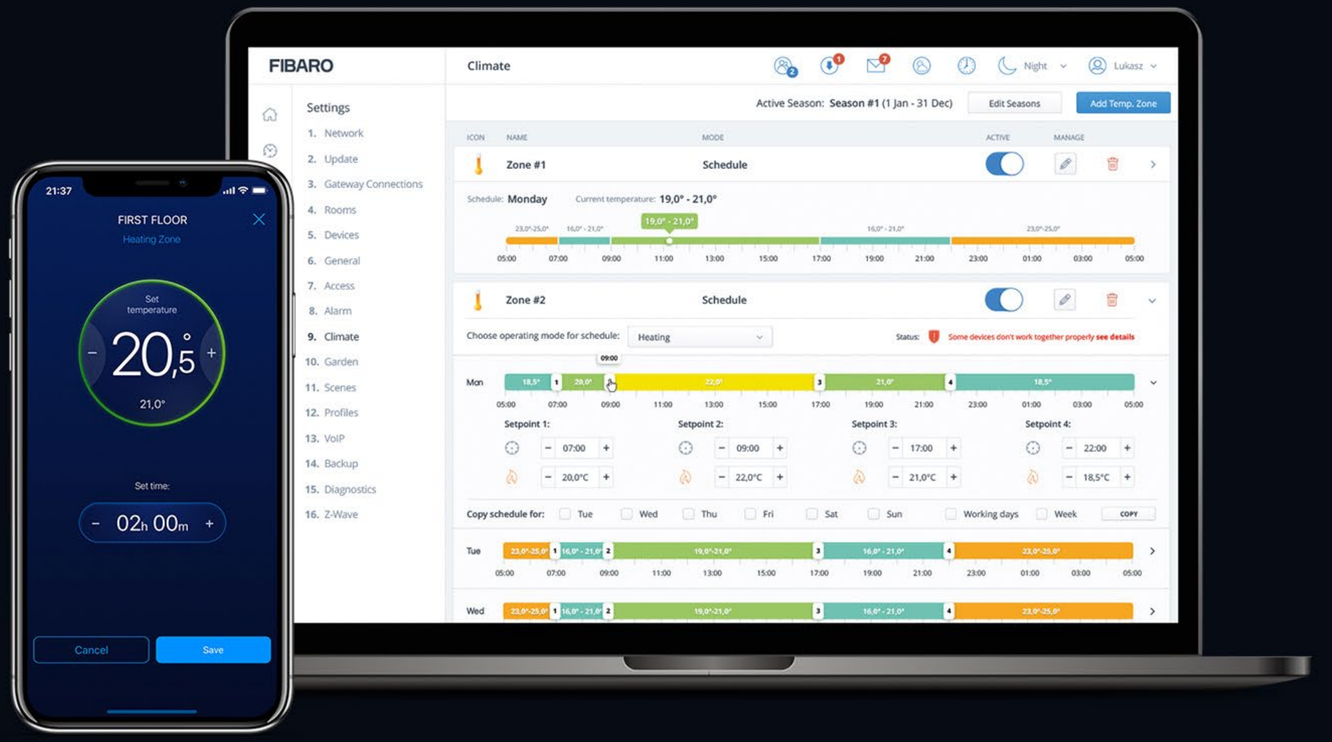
Personalized household profiles

Customized profiles are a set of settings that customize the entire home just as you like it to be. Automation profiles are one-click actions to manage smart home scenarios. A person leaving the house can choose the „Absence” profile and the system will do the rest, including turning off all lights, lowering the temperature, arming the alarm or closing the blinds.

FIBARO

Advanced schedules

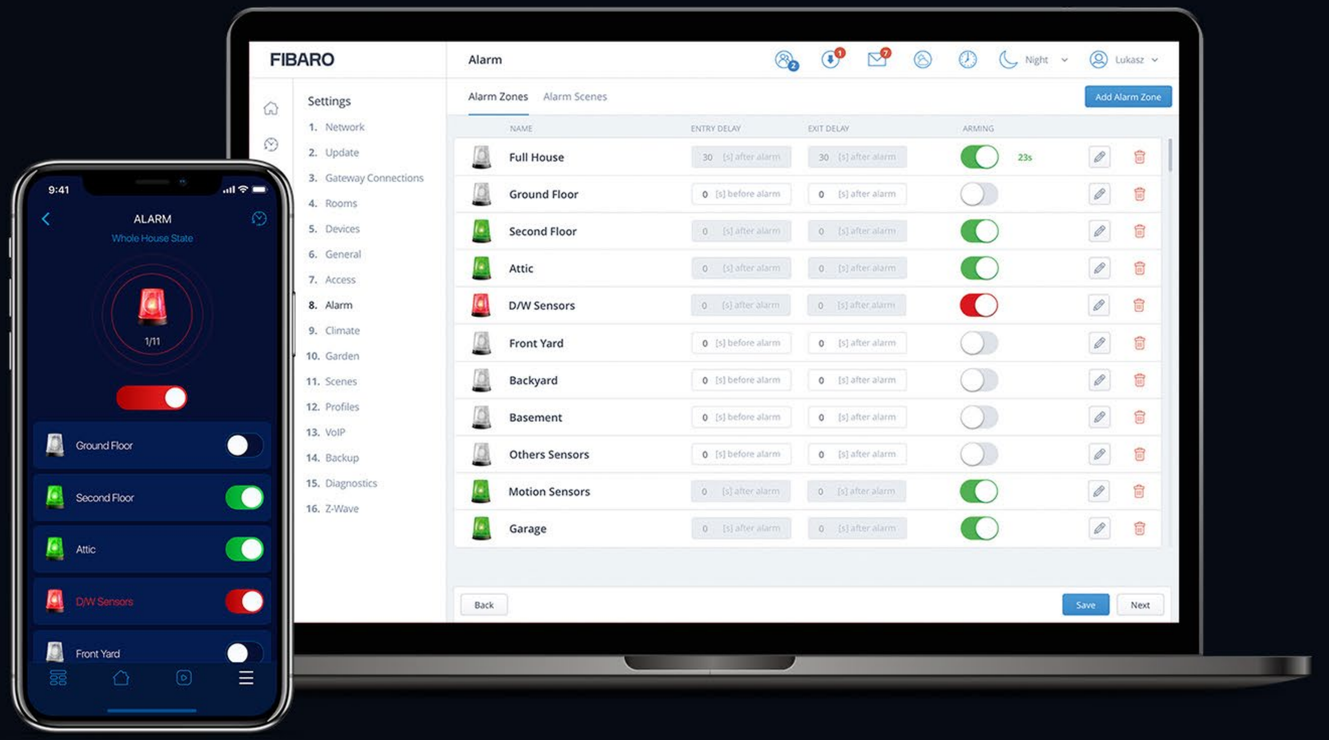
We have designed a way to create schedules to make it even more intuitive for the user.



FIBARO

A better alarm panel

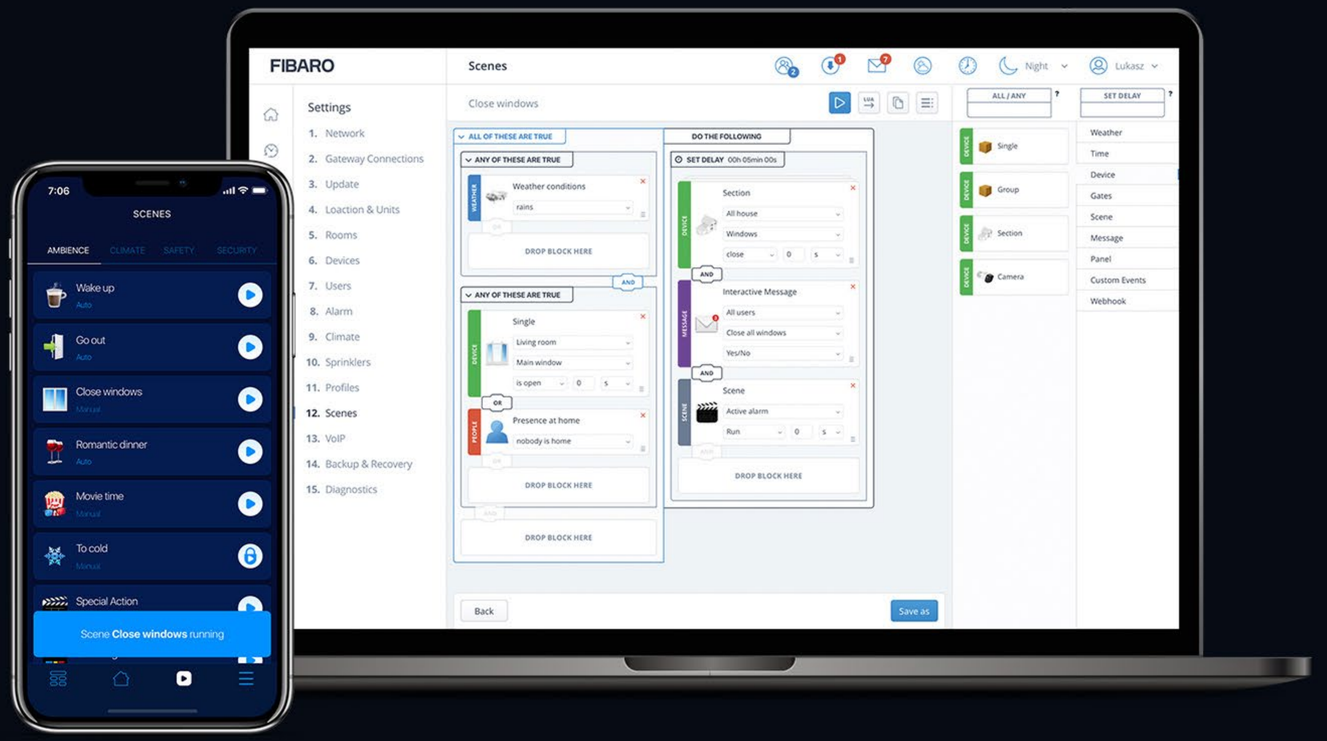
Alarm system configuration has never been so quick and intuitive.
All alarm devices are located in one place.



FIBARO

Automation designing breakthrough

Creating scenes is now much easier and more fun than ever.
Automation blocks let to create both basic and the most common automation or complex scenarios combining multitude of parameters.



FIBARO

Ready to integrate

HC3 is the quintessence of integration in the Internet of Things environment. Experience the Quick Apps, a new, universal mechanism that unifies usability of all connected devices within smart home system.
